## PROFILE

---

I am a Systems and Computer Engineer with a strong focus on software development and expertise in both frontend development, version control, and UI/UX design. I am a dedicated, results-driven professional who consistently strives for excellence and delivers high-quality solutions. Committed to continuous improvement, I view challenges as opportunities to learn and grow. My passion for emerging technologies keeps me adaptable and up-to-date in a fast-evolving industry, enabling me to create innovative and impactful solutions.

## PROFESSIONAL EXPERIENCE

---

### Project Engineer

Universidad del Norte

01/2023 – present  
Barranquilla,  
Colombia

- I provide application support at the university, specifically for platforms like ID Uninorte (a virtual ID card for students, faculty, and staff) and Hola Uninorte (a virtual orientation app for first-semester undergraduate students). I played a key role in the development of a new version of Hola Uninorte, contributing to technological improvements and ongoing support.
- I assist in programming services for the academic community, including process automation and the creation of web forms.
- As a trainee trainer, I also provide instruction on development in CMS Liferay.

**Technologies:** HTML5, CSS3, PHP, JavaScript, Figma, GitHub, CMS Liferay 7.3, Flutter, Dart.

### Administrative Assistant

Universidad del Norte

01/2022 – 12/2022  
Barranquilla,  
Colombia

I worked as a developer on the New Media team in Uninorte's Communications Office. My responsibilities included:

- Developing templates for email disclosure campaigns.
- Creating functional components to enhance the web editing experience for content publishers, including features such as carousels, accordions, and more.

**Technologies:** HTML5, CSS3, JavaScript, Figma, CMS Liferay 7.3.

## EDUCATION

---

### Systems and Computer Engineering

Universidad del Norte

01/2018 – 12/2022  
Barranquilla,  
Colombia

Throughout my degree, I developed strong foundations in software development, algorithms, data structures, networks, and systems architecture. I gained hands-on experience in web development using technologies like HTML5, CSS3, JavaScript and React. I also worked with technologies like Python, Java and C#.

## SKILLS

---

### Frontend Development

HTML5, CSS3, JavaScript, TypeScript, ReactJS, NextJS, Astro, Bootstrap, Tailwind

### Mobile Development

Dart, Flutter

### Version control

Git, Github

### UI/Design

Figma
